

First Choice hand wash for healthcare personnel

## Chlorhexidine Gluconate Skin Cleanser

### First choice hand wash for healthcare personnel

- Ensures rapid killing of transient & resident skin flora including MRSA & VRE.
- Effective against HIV, HBV, RSV, HSV and fungi.
- Persistent activity prevents re-growth of microbes for up to 6 hours.
- Emollient action of glycerin prevents skin drying & skin irritation.
- Presence of surfactant (NP-9.5) provides additional cleansing action.
- Broad spectrum action within 15 seconds.

### Application

- Use undiluted as broad-spectrum antimicrobial hand skin cleanser by scrubbing 5ml of product on wet hands and forearms thoroughly for 30 seconds. Rinse off and dry.
- Minimize risk of surgical site infection by using undiluted as pre and post-operative shower/ body skin cleanser. Apply onto wet body and work up lather. Rinse thoroughly, wash off and dry.
- Also effective as surgical hand wash & for superficial skin wound cleansing.

**RECOMMENDED BY MAJOR INTERNATIONAL  
GUIDELINES FOR PATIENTS UNDERGOING  
ELECTIVE SURGERY**
