

LABSEPT[®] Hand Sanitizer

No Water. No Towel. Just Rub & Disinfect.

Mecetronium / Alcohol Hand Sanitizer

Active Action

Broad spectrum microbicidal action of Mecetronium, Isopropyl alcohol & 1-propanol ensures-

- Rapid killing of bacteria (including-MRSA & VRE) & tubercle bacilli.
- Virucidal activity against HIV, HBV, HCV, HSV, RSV.
- Fungicidal activity against Candida species.

Application

- Use before making direct contact with patients.
- Sanitize hands prior to inserting indwelling urinary catheters, peripheral vascular catheters.
- Use to sanitize hands after making contact with patient's intact skin, body fluids or wound dressings.
- Appropriate to use after contact with inanimate objects in immediate patient vicinity.
- Use to sanitize prior to wearing and after removing gloves.

AN ALCOHOLIC HAND RUB IS THE MOST EFFICIENT, TIME SAVING PROCEDURE FOR A HYGIENIC HAND WASH.

Available in 100ml & 500ml packs
